● **Comments:**

Attached is the information on the mix design for matching the precast.

- 1 part white Portland cement
- 1 part all purpose brown sand
- 3 parts crushed rock
- Acrylic 60 bonding agent

The aggregate came from Colorado Quarries (719) – 275 – 6894

It is called New Flamingo and is 1/8" to 1/4" aggregate. We did dye a very minor amount of it black to get a better match.

Call if you have questions.

A handwritten signature in black ink, appearing to read 'John Bosio', is written over a horizontal line.
